HERCULES® BLENDER OWNER'S GUIDE & USER'S MANUAL

SAFETY INSTRUCTIONS (For Household Use Only)

OTJ-767

WHEN USING ELECTRICAL APPLIANCES, REMEMBER TO ALWAYS THINK SAFETY FIRST

READ ALL SAFETY PRECAUTIONS AND INSTRUCTIONS BEFORE USING THE HERCULES® ELITE BLENDER.

① INSTRUCTIONS FOR USE:

WARNINGS!

POLARIZED PLUG: To reduce the risk of electric shock, the appliance has a polarized plug (one prong is wider than the other). The plug will fit into a polarized outlet only one way. The plug should fit into the socket without being forced. If the plug does not fit, turn the plug until it matches the socket in size and shape. If the plug still does not fit into the socket, please contact a licensed electrician to install the proper outlet. **DO NOT MODIFY THE PLUG IN ANY WAY!**

1. Avoid shock! **DO NOT** submerge the blender or allow the power cord to come into contact with water or any other liquid. **DO NOT PUT THE BLENDER OR ANY OF ITS PARTS IN THE DISHWASHER!**
2. Never leave the blender on while it is unattended.
3. Children should not use the blender, and extreme caution should be used when using the blender around children.
4. **DO NOT** abuse the power cord. Never use the cord to move the blender from one place to the next. Never yank the power cord from the socket/electrical outlet. Firmly grasp the power cord at its base and pull to disconnect it.
5. When not in use, unplug the blender. **Never touch any moving parts or the blender's blades.** This could lead to severe injury, such as the fingers or hand being chopped off. This is **NOT** a toy.
6. If the cord is damaged, do not operate the blender. If the blender or cord has been damaged in any kind of way, return the appliance to the retailer for proper assessment and repair.
7. **ALWAYS** keep the blender cord on top of the counter surface. **NEVER** allow the cord to hang loosely where it can get caught on other items or people. Not doing so could cause damage to the blender or injury to other people.
8. Use a dry, level surface when operating the blender.
9. Keep hair, hands, clothing, and all utensils out of the blender container while the blender is in use. A spatula can only be used when the blender is in the **OFF** position.
10. CAUTION: The blender blades are extremely sharp! Always handle the blades with care to avoid injury.

11. **NEVER** allow your hand or anything other than the food being blended to come into contact with the blades.

12. **DO NOT** place forks, spoons, knives, or any other metal objects inside the blender.

13. **NEVER** attempt to sharpen the blades.

14. **DO NOT** use the blender if the pitcher, the blades, or the electrical cord are damaged.

15. If your blender model comes with a mixing rod, **DO NOT** put it inside the blender pitcher while the blender is in use. Only use the mixing rod when the blender is off.

16. To avoid injury, never place the blade assembly directly onto the base of the blender if it is not attached to the pitcher.

17. **DO NOT** operate the blender on or around hot surfaces. Keep the blender away from stoves, electric burners, and ovens while it is in use.

18. **DO NOT** alter or tamper with the blender, its blades, or the electrical cord. Doing so could result in personal injury.

19. Use caution when blending hot liquids.

20. **DO NOT** attempt to blend raw meat or bones. This could permanently damage your blender.

21. Avoid blending food that is hotter than180°F/82°C.

22. **DO NOT** overfill the blender.

23. To avoid scalding and burns, use caution when blending hot foods. Always open the pouring spout to allow the liquid to cool before pouring it from the blender.

24. **DO NOT** turn the blender on when it is empty.

25. Before cleaning the blender, allow it to cool.

26. If the blender becomes overheated, a thermal switch will automatically shut the motor off. To reset the blender, unplug it and allow it to cool for five minutes. Afterwards, you can plug the blender back in and continue blending. If your blender model comes with a thermal reset button, you can push it to reset the blender and then continue blending.

27. An extension cord can be used with the blender; however, make sure that the extension cord is not damaged and that it is at least 15 amperes. Make sure the extension cord and the blender cord are both positioned in a way that will not allow anyone, especially small children, to accidentally trip over them.

Hercules® Elite
The Last Brand You Will Ever Buy!

③ USING THE HERCULES BLENDER:

Before First Use:

Remove all packaging material and labels from the appliance.

Remove the pitcher from the base. Wash/rinse the lid and blender out with warm water, and dry the bottom with a soft cloth before placing it back on the base.

The motor base can be wiped with a clean, damp cloth, but do not submerge it in water.

****Always make sure blender is unplugged when cleaning or when assembling.**

The Hercules® Elite Blender

Congratulations! You have just purchased The Hercules® Elite Blender with the State-of-the-Art 12 Chopper-Blade System – the professional grade blender with major muscle…The Last Brand You Will Ever Buy!

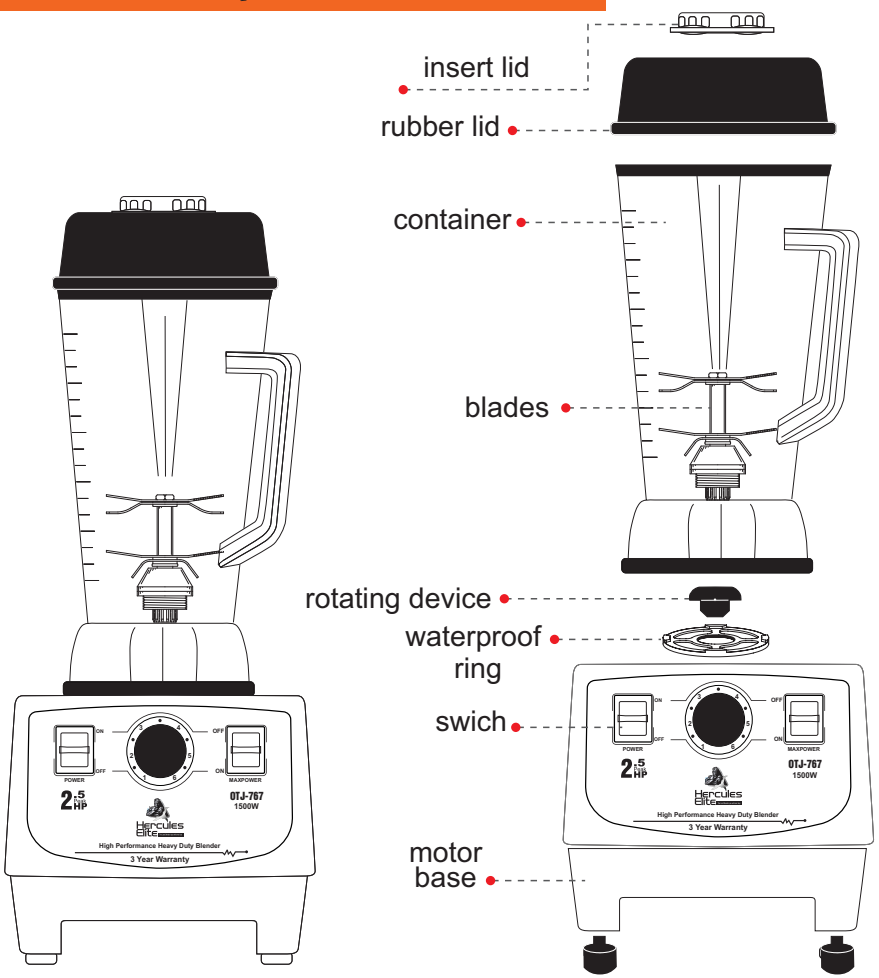
ACCESSORIES:

THE POSSIBILITIES ARE ENDLESS:

The Hercules® Elite Blender is equipped with a high powered motor boasting 30,000 RPM. You can blend dry or wet foods into a powder or paste effortlessly without losing their natural, nutritional value. This blender is professional-grade and multi-functional, which makes it perfect for home and commercial use.

PROFESSIONAL & QUALITY CONSTRUCTION:

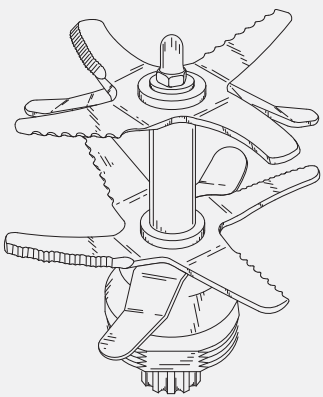


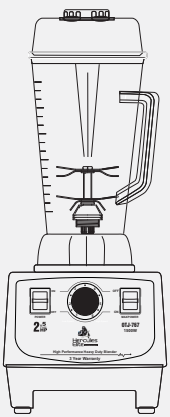
CLEANING & MAINTENANCE:

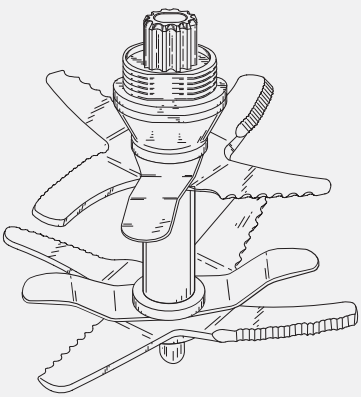
Clean blender after each use. Begin by unplugging the power cord from the electrical outlet. Remove the pitcher from the blender's base and rinse it with warm water. Dry the pitcher with a soft cloth, being careful to avoid touching the sharp blades. Alternatively, the pitcher can be air-dried by placing it upside down on a counter-top dish rack. Wipe the base of the blender with a soft, damp cloth. Always make sure the blender is unplugged when it is not in use.

TROUBLESHOOTING WHEN BLENDER IS NOT WORKING:

- **Check the safety circuit breaker switch** (for over current protection, this is usually located on the back of the blender or underneath the blender base) Push or flip the button to activate the switch.
- Make sure the blender cord is properly connected into the electrical wall socket.
- Check to make sure there is not a power outage or a blown fuse in your home.
- First, unplug the blender cord from the electrical wall socket. Make sure the blender pitcher and blades are properly attached and placed on the base correctly. After you have checked to make sure all of the parts are properly and safely attached, plug the blender in and turn it on.







Specications:
